

How to Help YOUR ONLINE KINDERGARTNER EXCEL

Kindergarten is one of the most crucial learning years in school—and there are many ways you can maximize your child's learning experience to help them excel in this grade and beyond!

01 USE MOVEMENT

Movement is key for kindergartners. It increases productivity, creativity, and social skills. Try incorporating afternoon walks or “wiggle breaks” to help them release bursts of energy.

02 INCORPORATE “BRAIN BUSTERS”

Brain busters help students build problem solving skills. Challenge your student's mind with complicated math problems before and after class.

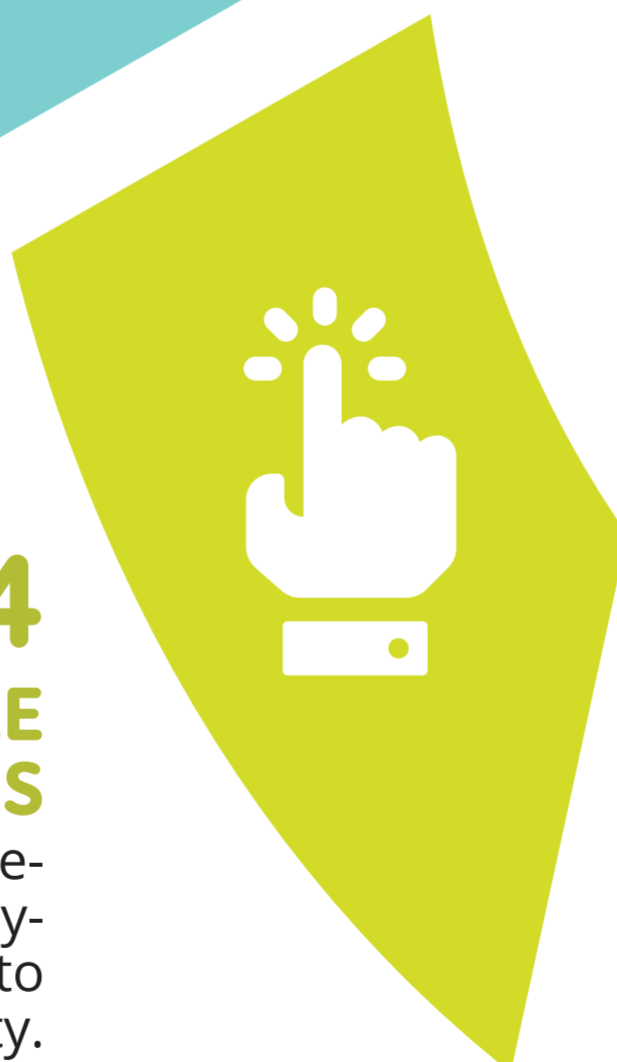

03 CREATE AN ENGAGING CURRICULUM

Prioritize relationships with your child's instructor. Discuss their learning preference often to ensure success!

04 PRIORITIZE FUN ACTIVITIES

Every school-aged student can benefit from some fun! Incorporate playground visits or assign art projects to help them flex their creativity.

05 REIMAGINE THE LEARNING SPACE

Learn from anywhere. Allow your students to have class in the backyard or end the day early for a field trip.
